

# Field Service Specialist

## About Stockpile Reports

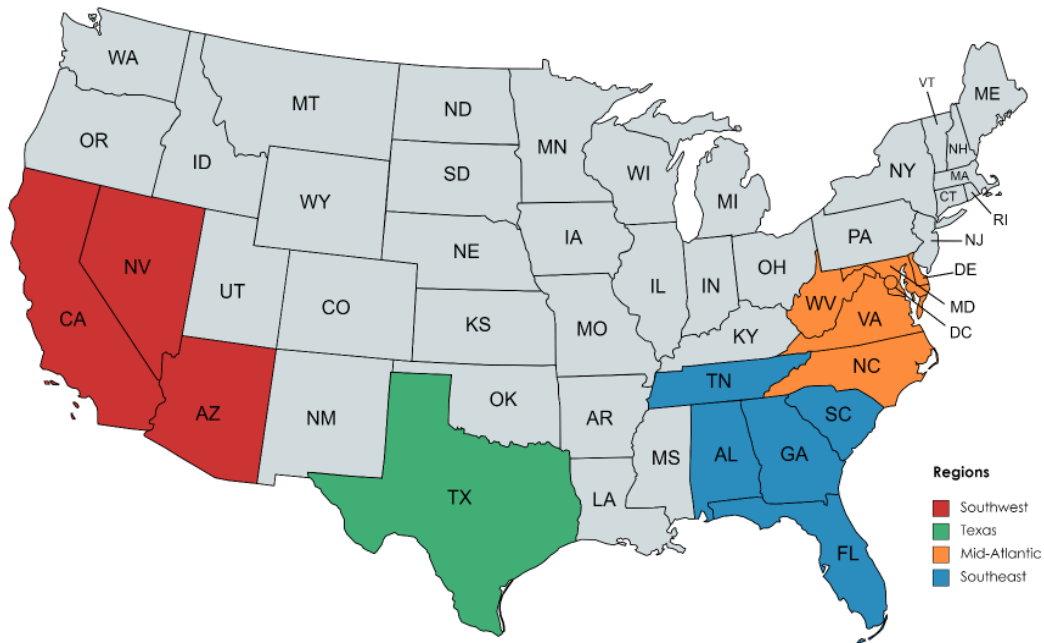

[Stockpile Reports](#) is the first vertically integrated service for logistics and inventory management of bulk materials at scale, digitizing images of bulk materials to solve problems with accurate perpetual inventory and supply chain planning. Our company is growing and we are looking for abstract thinkers and independent, practical doers, who share an ethic of creating value by running at problems.

## Job Description

Experienced and proven entrepreneurs are looking for an exceptionally talented, passionate, and creative individual to support the rollout and success of our services globally. We are looking for someone who is outgoing, customer focused and enjoys interacting with others daily.

## Desired Geographic Locations

Currently, we are seeking team members for the Southeast, Mid-Atlantic, Texas, and Southwest regions. Please specify in your application which region you are interested in.

## Job Responsibilities

Subject to change over time, but for the first six months core responsibilities will include:

- Monitor, preventative maintenance, and service of deployed systems
- Install hardware and capture calibration data
- Remote support of activation and services performed by third-party service provider
- Identify, summarize, and report on service needs and feedback
- Maintain and document support and field project protocols

## Skill Sets and Experience

Convince us you have enough. We are looking for:

- 2+ years of technical support or field experience
- Willing to travel regularly and on short notice (~75% of job)
- Strong written and verbal communication skills
- Outgoing, self-directed, and energetic
- Adaptable, flexible, and level-headed when supporting evolving project requirements
- Familiarity in working in an industrial environment and/or installation of cameras, scanners
- A surface level understanding of 3D computer vision and photogrammetry is a plus
- Part 107 license is a plus

## Tell Tale Signs This Job May Be for You

- You are always looking for more efficient ways of solving a problem
- You love engaging with and conversing with others
- You enjoy helping others succeed
- You enjoy traveling, experiencing new places and meeting new people

## How to Apply

Visit our [careers page](#), fill out our application form, and upload your resume. Be sure to select the appropriate geographic region for your application.
